

Amendments to the Claims:

Please substitute the following clean copy text for the pending claims of the same number.

1. (currently amended) A cable retractor assembly, comprising:

an enclosure for housing a rotatable reel, the enclosure having a first side and an opposing second side,

a biasing member coupled to the reel and the enclosure for urging the reel to rotate in a predetermined direction,

a first plurality of terminals disposed on the first side of the enclosure, and

a second plurality of terminals disposed on the second side of the enclosure, the first plurality of terminals electrically coupled to the second plurality of terminals, wherein the first plurality of terminals is coupleable to a power supply external to an electronic device and the second plurality of terminals is coupleable to the electronic device.

2. (canceled)

3. (currently amended) The cable retractor of claim 21, wherein the electronic device is a wireless phone.

4. (original) The cable retractor of claim 3, wherein the wireless phone is a cellular phone.

5. (original) The cable retractor of claim 1, further comprising a length of cable having a first end and a second end, the first end of the cable coupled to the rotatable reel and the second end of the cable comprising a speaker.

6-21. (canceled)

22. (currently amended) A cable retractor assembly coupleable to a communications device, comprising:

an enclosure for housing a rotatable reel, wherein the enclosure is detachably coupleable to the communications device,

a biasing member coupled to the reel and the enclosure for urging the reel to rotate in a predetermined direction, and

an actuator coupled to the enclosure to signal the communications device to pick up an incoming call.

23. (original) The cable retractor assembly of claim 22, wherein the communications device is a wireless phone.

24. (original) The cable retractor assembly of claim 22, wherein the communications device is a cellular phone.

25. (original) The cable retractor assembly of claim 22, further comprising a terminal for coupling the signal to the coupleable communications device.

26. (original) The cable retractor assembly of claim 22, further comprising a speaker coupled to a cable for generating sound waves, the cable coupled to the reel.

27. (currently amended) A cable retractor assembly coupleable to a portable communications device, comprising:

a communications circuit for sending and receiving wireless communications signals,

a cable retractor assembly for retracting a coupled cable, the cable comprising a first end and a second end, the first end coupled to the communications circuit and the second end comprising a speaker, and

an enclosure for housing the communications circuit and the retractor, wherein the enclosure is detachably coupleable to the communications device.

28. (currently amended) The cable retractor assembly coupleable to a portable communications device of claim 27, further comprising a microphone coupled to the cable a spaced distance from the speaker.

29. (currently amended) The cable retractor assembly coupleable to a portable communications device of claim 28, further comprising an enclosure for housing the speaker and a microphone.

30. (currently amended) A cable retraction assembly, comprising:

a reel rotatable about an axis for the winding and unwinding of a cable, the cable having at least two electrical conductors;

a biasing member coupled to the reel for urging the reel to rotate in a first

direction; ~~and~~

a force applicator for resisting winding and unwinding of the cable; and

an enclosure for housing the reel, the biasing member, and the force applicator
wherein the enclosure is detachably coupleable to an electronic device.

31. (original) The cable retraction assembly of claim 30, further comprising a speaker coupled to the cable for generating sound waves.

AS 32. (original) The cable retraction assembly of claim 31, further comprising a microphone coupled to the cable for detecting sound waves.

33. (canceled)

34. (currently amended) The cable retraction assembly of claim ~~33~~34, wherein the electronic device is a portable communications device.

35-40. (canceled) .

41. (currently amended) A cable retractor, comprising;

an enclosure ~~mechanically~~ detachably coupleable to a portable electronic device,

a rotatable reel,

a biasing member secured to the enclosure and the reel to urge the reel to rotate in a predetermined direction,

a length of cable having a first end and a second end, the first end coupled to the reel and the second end having a speaker coupled thereto, and

a plurality of terminals secured to the enclosure, the terminals electrically coupled to the first end of the cable and electrically coupleable to the portable electronic device.

AS

42. (currently amended) The cable retractor of claim 41, further comprising a microphone coupled to the cable for detecting sound waves.

43. (original) The cable retractor of claim 41, wherein the portable electronic device is a selected one of a AM/FM radio, a CD player, an MP3 player, a cassette player, a personal digital assistant, a computer, a cordless phone, a radio phone, and a cellular phone.
